Costa
County

September 19, 2002

Eric Bissinger
CIWMB
1001 I Street, P O Box 4025
Sacramento, CA 95812

**SUBJECT: FIVE YEAR REVIEW OF THE COUNTYWIDE INTEGRATED WASTE
MANAGEMENT PLAN (CIWMP)**

Dear Mr. Bissinger:

Enclosed please find Contra Costa County's "Five Year CIWMP Review Report" which has been reviewed by the Local Task Force. The Report addresses the areas required under CCR Section 18788(3). The County and LTF have concluded that a revision of the CIWMP is not warranted.

If you have any questions please feel free to contact me at (925) 335-1224 or dding@cd.co.contra-costa.ca.us.

Sincerely,

A handwritten signature in black ink that reads "Deidra Dingman".

Deidra Dingman
Solid Waste Program Manager

APPENDIX A: Jurisdictions' PARIS Reports		

CHAPTER 1.0 INTRODUCTION

The California Integrated Waste Management Act of 1989 (Assembly Bill 939) requires cities and counties in California to reduce the amount of solid waste disposed in landfills and transformed by 25% by 1995; by 50% by the year 2000 and beyond through source reduction, recycling, and composting activities. Transformation may be used to reduce the wastes sent to landfills by no more than 10% in the year 2000.

The Countywide Integrated Waste Management Plan (CIWMP) is comprised of the cities', regional agency's and county's Source Reduction and Recycling Elements (SRREs) and Household Hazardous Waste Elements (HHWEs), as well as the County-prepared Non-Dipsosal Facility Element (NDFE), Countywide Siting Element (CSE) and Summary Plan. Each jurisdiction's respective SRRE, HHWE and NDFE are the guiding documents for how it will attain these waste reduction goals. The CIWMP is intended to be a planning document, which summarizes waste management problems facing the respective jurisdictions. It also provides an overview of the actions that will be taken to achieve PRC section 41780. CIWMPS and any amendments are approved by the County and by a majority of the cities within the County.

PRC Section 41822 requires each city and county to review its SRRE or the CIWMP at least once every five years to:

- (1) correct any deficiencies in the element or plan;
- (2) comply with the source reduction and recycling requirements established under PRC Section 41780; and
- (3) revise the documents, as necessary.

The California Integrated Waste Management Board (Board) clarified the five-year CIWMP review process in CCR Section 18788. Section 18788 states that prior to the fifth anniversary of Board approval of the CIWMP, the Local Task Force (LTF) shall complete a review of the CIWMP to assure that the County's waste management practices remain consistent with the hierarchy of waste management practices defined in PRC Section 40051.

The hierarchy stated in PRC 40051 is:

- (1) source reduction;
- (2) recycling and composting;
- (3) environmentally safe transformation and environmentally safe land disposal.

The process identified in CCR 18788 is summarized as follows:

- ① prior to the 5th anniversary, the LTF shall submit written comments on areas of the CIWMP, which require revision to the County and the Board;
- ② within 45 days of receipt of comments, the County shall determine if a revision

is necessary and notify the LTF and the Board of its findings in a CIWMP Review Report; and

(o) within 90 days of receipt of the CIWMP Review Report, the Board shall review the County's findings and, at a public hearing, approve or disapprove the County's findings. CCR 18788 also identifies the minimum issues, which are to be addressed in the CIWMP Review Report. They are:

- (A) changes in demographics in the county;
- (B) changes in quantities of the waste within the county;
- (C) changes in funding sources for administration of the Countywide siting element and summary plan;
- (D) changes in administrative responsibilities;
- (E) program implementation status;
- (F) changes in permitted disposal capacity and quantities of waste disposed of in the county;
- (G) changes in available markets for recyclable materials; and
- (H) changes in the implementation schedule.

On October 30, 1998 and again on July 21, 2000, the CIWMB Office of Local Assistance sent letters to jurisdictions clarifying the Board's oversight of the five year revision process.

The July 21st letter essentially noted that 1) the five year anniversary is from the date of approval by the Board of the CIWMP, 2) the Board Legal staff determined that jurisdictions can utilize their annual reports to update program information, if a revision is not determined by the jurisdiction to be necessary, and 3) that if a revision is determined to be necessary, it may be submitted with the next annual report.

CHAPTER 2.0 BACKGROUND

Unincorporated Contra Costa County and the Cities of Antioch, Brentwood, Clayton, Concord, Danville, Lafayette, Martinez, Moraga, Orinda, Pittsburg, Pleasant Hill, San Ramon, Walnut Creek and the West Contra Costa Integrated Waste Management Authority developed the below documents to comply with the Integrated Waste Management Act (AB939) and these were compiled as components of the Countywide Integrated Waste Management Plan (CIWMP). These documents include:

- Source Reduction and Recycling Elements (SRREs) for each city, regional agency, and county named above;
- Household Hazardous Waste Elements (HHWEs) for each city, regional agency, and county named above;
- Nondisposal Facility Elements (NDFE) for each city, regional agency, and county named above.

The following Contra Costa County-prepared documents in addition to the above mentioned components comprise the CIWMP:

- Countywide Siting Element (CSE)
- Summary Plan (SP)

The CIWMP was approved by the Board on December 15, 1993. Thus, the anniversary date for the first five-year CIWMP review was December 15, 1998. County and other local city/agency staff focused limited staff resources on implementation of programs. Unfortunately this meant there were not sufficient local staff resources to also undergo the five-year review at that time.

The purpose of this CIWMP Review Report is:

- (1) to document the compliance of PRC 41822 and CCR 18788 by Contra Costa County, the Cities, and the Regional Agency; and
- (2) to solicit a wider amount of review, recommendations, and support for the course of action identified by the Local Task Force in Contra Costa County to achieve increased levels of waste diversion.

CHAPTER 3.0 CHANGES AND TRENDS

This chapter summarizes the changes and trends related to Demographics, Amount of Waste Generated and Disposed and Diversion. Additionally, this chapter provides an overview of the County's Setting, Administrative Responsibilities, Funding Sources, Program Implementation, Permitted Disposal Capacity, Available Markets and Implementation Schedule.

SETTING

Contra Costa County is one of the nine counties in the San Francisco-Oakland Bay Area. The County covers about 733 square miles and extends from the northeastern shore of San Francisco Bay easterly about 50 miles to San Joaquin County. The western and northern shorelines are highly industrialized, while the interior sections are suburban/residential, commercial and light industrial. Agricultural areas in the County are primarily located in East County. Contra Costa County is generally split into three geographical areas: West, Central and East. There are 19 incorporated cities in Contra Costa County. The cities are identified below within the region of the County they are located in:

- | | |
|----------|---|
| West: | El Cerrito, Hercules, Pinole, Richmond & San Pablo |
| Central: | Clayton, Concord, Danville, Lafayette, Orinda, Martinez, Moraga, Pleasant Hill,
San Ramon & Walnut Creek |
| East: | Antioch, Brentwood, Pittsburg & Oakley |

Figure 1. Map of Contra Costa County

ADMINISTRATIVE RESPONSIBILITIES

No substantial changes have occurred in the administration of the CIWMP. Below is a listing of the agencies and/or departments, which are currently implementing AB939 programs for the local jurisdictions:

- **CENTRAL COUNTY:** The Cities of Clayton, Concord, Martinez, Pleasant Hill and San Ramon administer SRRE and HHWE elements for their own cities. Although not a Regional Agency, a JPA, the Central Contra Costa Solid Waste Authority, develops programs and prepares reports for AB939 compliance based on the SRRE and HHWE elements for the cities of Danville, Moraga, Orinda, Lafayette, Walnut Creek and near-by vicinities of Unincorporated County.
- **WEST COUNTY:** Another JPA, which is also a Regional Agency¹, the West Contra Costa Integrated Waste Management Authority (WCCIWMA), administers SRRE and HHWE elements for the cities of Richmond, San Pablo, Hercules, Pinole, and El Cerrito.
- **EAST COUNTY:** The City of Pittsburg's Environmental Affairs Division administers SRRE and HHWE elements as does the City of Antioch's Public Works Department, and the City of Brentwood's Public Works Department.
- **UNINCORPORATED:** The Solid Waste Division of the County Community Development Department is responsible for the administration of the Unincorporated County SRRE and HHWE and continues to perform the same function for the newly incorporated City of Oakley. Effective in 2001, Contra Costa County, the City of Oakley and Ironhouse Sanitary District have agreed to form a Regional Agency¹.

OVERVIEW

Existing SRRE and HHWE goals, policies and objectives remain consistent with PRC 40051 and 40053. The existing and selected programs for each SRRE and HHWE are reviewed continually by local jurisdictions. Nearly all programs have been implemented. The annual reports and the Planning Annual Report Information System (PARIS) for the County, Regional Agencies and each city, are up to date. Although there have been some changes in program implementation, schedules, costs, and results, these changes are not considered to be significant. Furthermore, it is felt that continued emphasis on program development, evaluation, and implementation are more important than refining the CIWMP through a revision.

DEMOGRAPHICS

The County is the ninth most populous county in California, with its population reaching approximately 948,816 as of April 1, 2000. The population of Contra Costa County is

¹ Cities and counties may join together to form "regional agencies". Regional agencies can report diversion and disposal numbers as one entity. Regional agencies may prepare a single set of waste management planning documents and jointly implement diversion.

projected to exceed 1.1 million by the year 2020. In addition to population growth, Contra Costa County's 1999 employment statistics was 475, 300 and the unemployment rate of 3.0% for that same year. This is significantly lower than the state's 1999 unemployment rate of 5.2%.

Tables 1 through 7 depict demographic changes from 1990 to 1999 (in a couple of cases only data for 1990 and 2000 available). The County has experienced significant growth, which has resulted in increased waste generation. The data shown in these tables use standardized data to maintain continuity for the purposes of this report. However, the CIWMB allows jurisdictions to use alternative data upon receiving approval from the CIWMB. The actual data used in jurisdictions actual annual reports may differ.

Table 1. Population²

Jurisdiction	Population			
	1990	1999	Difference	% Change
Antioch	62,195	82,268	20,073	32%
Brentwood	7,563	20,235	12,672	168%
Clayton	7,317	11,191	3,874	53%
Concord	111,348	115,525	4,177	4%
Danville	31,306	40,233	8,927	29%
Lafayette	23,366	24,443	1,077	5%
Martinez	31,808	36,911	5,103	16%
Moraga	15,987	16,870	883	6%
Orinda	16,642	17,502	860	5%
Pittsburg	47,607	53,480	5,873	12%
Pleasant Hill	31,585	33,197	1,612	5%
San Ramon	35,303	45,083	9,780	28%
Walnut Creek	60,569	64,501	3,932	6%
Unincorporated*	151,395	179,232	27,837	18%
WCCIWMA	169,741	183,756	14,015	8%
Countywide ³	803,732	924,427	120,695	15%

Contra Costa County experienced a 15% population growth between 1990 and 1999. However this growth was not evenly distributed throughout the County. Some cities had fairly low growth such as: Concord (4%); Lafayette and Orinda (5%); and Moraga and Walnut Creek (6%). Growth in unincorporated Contra Costa County was 18%, slightly exceeding the average of 15%. Others had higher growth such as San Ramon (28%), Danville (29%), and Antioch (32%). The population growth in Brentwood (168%) is the largest increase in the County.

Brentwood's population growth is due primarily to new housing development. Brentwood has handled this population growth by continuing to provide the same services but to more customers, additionally they have established specific hauling rates to encourage diversion of construction & demolition materials.

² Source: California Department of Finance – Demographic Research Unit

* Unincorporated includes City of Oakley

³ Not a weighted average.

San Ramon, like other high growth areas in Contra Costa County, did not necessarily anticipate the tremendous residential growth that occurred during the '90s at the time it prepared its SRRE. This growth can be attributed to the economic prosperity enjoyed by the state, and particularly the technology rich Bay area in the mid to late '90s. Increased numbers of jobs in Silicon Valley fueled the demand for housing throughout the Bay area and particularly Contra Costa County. While this demand was met in San Ramon, in part, through in-fill development, the City soon found itself confronting the approval of a large (e.g., 10,000 unit) housing project in neighboring unincorporated Contra Costa County. Unable to stop the project, the City agreed to annex the houses once they were constructed and occupied. Construction of the first of these homes was completed, and they began to be occupied in 1999. San Ramon's current franchise agreement for the collection of solid waste and residential recyclable, entered into in 1996, anticipated some of this growth and provided for a highly effective residential curbside recycling program. San Ramon's residential recycling rate continues to exceed 60%.

Table 2. Housing Units⁴

Jurisdiction	Housing Units			
	1990	1999	Difference	% Change
Antioch	22,973	29,288	6,315	27%
Brentwood	2,628	6,611	3,983	152%
Clayton	2,361	3,721	1,360	58%
Concord	43,715	44,886	1,171	3%
Danville	11,466	14,376	2,910	25%
Lafayette	9,270	9,451	181	2%
Martinez	12,970	14,455	1,485	11%
Moraga	5,687	5,778	91	2%
Orinda	6,475	6,660	185	3%
Pittsburg	16,721	17,919	1,198	8%
Pleasant Hill	13,653	14,039	386	3%
San Ramon	13,531	16,780	3,249	24%
Walnut Creek	29,968	30,956	988	3%
Unincorporated [■]	58,344	65,543	7,199	12%
WCCIWMA	66,408	69,449	3,041	5%
Countywide ⁵	316,170	349,912	33,742	11%

The increase in population is very similar to increases in the number of housing units per jurisdiction. With the exception of Clayton, the percent increase in population was higher than the percent increase in housing units. Countywide there was an 11% increase in total housing units between 1990 and 1999. The following five jurisdictions experienced a significantly larger percentage increase in housing units from the countywide increase: Brentwood (152%), Clayton (58%), Antioch (27%), Danville (25%) and San Ramon (24%). The following seven jurisdictions experienced a significantly smaller percentage increase in housing units from the countywide increase: WCCIWMA (5%), Concord

⁴ Source: California Department of Finance – Demographic Research Unit

[■] Unincorporated includes City of Oakley

⁵ Not a weighted average

(3%), Orinda (3%), Pleasant Hill (3%), Walnut Creek (3%), Lafayette (2%), and Moraga (2%).

Table 3. Persons per Household⁶

Jurisdiction	Persons per Household			
	1990	1999	Difference	% Change
Antioch	2.891	2.978	0.087	3%
Brentwood	3.036	3.210	0.174	6%
Clayton	3.138	3.019	-0.119	-4%
Concord	2.628	2.642	0.014	1%
Danville	2.817	2.865	0.048	2%
Lafayette	2.586	2.632	0.046	2%
Martinez	2.436	2.523	0.087	4%
Moraga	2.631	2.657	0.026	1%
Orinda	2.632	2.667	0.035	1%
Pittsburg	3.019	3.139	0.120	4%
Pleasant Hill	2.395	2.430	0.035	1%
San Ramon	2.747	2.800	0.053	2%
Walnut Creek	2.110	2.151	0.041	2%
Unincorporated*	2.714	2.857	0.143	5%
WCCIWMA	2.740	2.670	-0.070	-3%
Countywide	2.643	2.730	0.087	3%

There was only minor changes in the average persons per household in all the jurisdictions in the County. The countywide average persons per household in 1990 was 2.643 and in 1999 was 2.730. Walnut Creek had the lowest average persons per household in both 1990 (2.110) and 1999 (2.151). Clayton had the highest average persons per household in 1990 (3.138) and Brentwood had the highest average persons per household in 1999 (3.210). Only Clayton and the WCCIWMA experienced a decrease in the average persons per household from 1990 to 1999.

Table 4. Countywide Race/Ethnicity Data⁷

Category	Race/Ethnicity			
	1990	% of Total	2000	% of Total
White	560,146	69.7%	549,409	57.9%
Hispanic	91,282	11.4%	167,776	17.7%
Black/African American	72,799	9.1%	86,851	9.2%
American Indian/Alaska Native	4,441	0.6%	3,648	0.4%
Asian/Hawaiian/Pacific Islander	73,810	9.2%	105,838	11.2%
Other	1,254	0.2%	2,636	0.3%
Two or More Races	-	-	32,658	3.4%
Total	803,732	100.0%	948,816	100.0%

The racial/ethnic categories in the census changed between 1990 and 2000. In the 2000 census, respondents could mark more than one racial category.

⁶ Source: California Department of Finance – Demographic Research Unit

⁷ Source: US Census Bureau

Table 5. Countywide Household Income⁸

	1990	2000	Difference	% Change
Median Household Income	\$ 45,087	\$ 62,208	\$ 17,121	38%
Mean Household Income	\$ 55,033	\$ 78,946	\$ 23,913	43%

The increase in the median household income of 38% is very similar to the increase in inflation for this area as represented by the SF Bay Area CPI, which increased by 36.7% between 1990 and 2000. Adjusting the above income statistics for 1990 to reflect inflation (SF Bay Area CPI) it would result in a median income of \$61,634 and a mean income of \$75,230.

Table 6. Taxable Sales (in Dollars)

Jurisdiction	Taxable Sales			
	1990	1999	Difference	% Change
Antioch	382,004	582,969	200,965	53%
Brentwood	47,626	153,190	105,564	222%
Clayton	18,368	36,978	18,610	101%
Concord	1,496,514	2,028,578	532,064	36%
Danville	200,841	340,528	139,687	70%
Lafayette	160,845	194,571	33,726	21%
Martinez	251,364	289,783	38,419	15%
Moraga	50,707	68,351	17,644	35%
Orinda	57,093	66,911	9,818	17%
Pittsburg	228,888	471,875	242,987	106%
Pleasant Hill	387,042	534,841	147,799	38%
San Ramon	416,327	1,300,641	884,314	212%
Walnut Creek	984,058	1,425,144	441,086	45%
Unincorporated [■]	560,025	681,130	121,105	22%
WCCIWMA	1,267,665	1,649,589	381,924	30%
Countywide ⁹	6,509,367	9,825,079	3,315,712	51%

The increase in taxable sales also varied a great deal by geographical area. The cities with the least percentage increase in taxable sales were Martinez (15%), Orinda (17%), Lafayette (21%) and the Unincorporated County (22%). The highest percentage increases were Clayton (101%), Pittsburg (106%), San Ramon (212%) and Brentwood (222%). However, percentage increases are not necessarily related to total taxable sales, i.e. cities with low taxable sales in 1990 did not need as much of an increase to double or triple the taxable sales. For example Brentwood had the greatest percent change (222%) by adding \$105,564 in taxable sales. However the following cities had larger increases than Brentwood: Antioch (\$200,956), Concord (\$532,064), Danville (\$139,687), Pittsburg (\$242,987), Pleasant Hill (\$147,799), San Ramon (\$884,314), Walnut Creek (\$441,086), Unincorporated County (\$121,105) and the WCCIWMA (\$381,924).

⁸ Source: US Census Bureau

[■] Unincorporated includes City of Oakley

⁹ Not a weighted average

San Ramon's tremendous increase in taxable sales (212%) is but one indication of the unprecedented growth experienced in the community's commercial sector. By the end of the '90s, business to business transactions in San Ramon accounted for over 65% of the City's taxable sales. Although not reflected in the employment data used in the Adjustment Method, during the '90s office space (particularly in the form of huge office park campuses) increased by millions of square feet, and the City became the telecommunications hub of the Bay area and home to dozens of Fortune 500 companies. In response to this growth, the City has and continues to expand its commercial recycling outreach effort. The City has developed unique, comprehensive, and highly effective technical assistance programs, such as the "Commercial Recycling, Enhancement, Analysis, Training and Education (CREATE) Program," never envisioned in the City's SRRE.

Table 7. Countywide Employment¹⁰

1990	1999	Difference	% Change
421,600	475,300	53,700	13%

Countywide employment increased by 53,700 persons or 13% as employment increased from 421,600 to 475,300. The County has one of the fastest growing work forces among Bay Area counties, with growth in its employment base being driven primarily by the need to provide services to an increasing local population. The largest concentration of new jobs was in the services industries, which increased by 7,000 new jobs or 6.6%. Due to the presence of relatively high-wage skilled jobs and relatively wealthy residents, the County achieves high rankings among all California counties on a variety of income measurements.

HOW DEMOGRAPHICS AFFECT DIVERSION RATES

Accurate base-year generation tonnage is critical to diversion goal measurement, because it establishes a starting point. Base-year generation means the amount of waste generated (disposed + diverted) during the year which was used for jurisdiction's solid waste generation study. The board calculates all future generation by extrapolating from the base year.

Waste generation in subsequent years is generally extrapolated using the CIWMB adjustment method. The adjustment method is a standard formula used in diversion rate measurement to offset changes in a jurisdiction's population and economic conditions between the base year and the measurement year (also referred to as reporting year). Without the adjustment method, population increase and economic booms would result in lower diversion rates. The adjustment method used the base-year generation amount and the changes in population and the economy to estimate the generation amount in each report year. The method uses four factors: population, employment, and taxable sales adjusted using the consumer price index. The adjustment method yields an estimated report-year generation tonnage. Jurisdictions' diversion rates are generally

¹⁰ Countywide employment data is shown since it is the number used in the CIWMB adjustment factor.

Contra Costa County

Five Year CIWMP Review Report

calculated by extrapolating tons diverted by subtracting the amount of disposal from the estimated report-year generation.

QUANTITIES OF WASTE

Table 8 provides the calculated per capita (pounds per person per day) of total waste generation within each jurisdictions Base Year. The statewide average per capita in 1990 for total waste generation was approximately 8 ppd. Table 9 provides the calculated per capita (pounds per person per day) of total waste generation within each jurisdictions in 1999.

As demonstrated in Table 8, only two jurisdictions were above the state average Base Year per capita waste generation. The Countywide average pounds per capita of 7.5, is below the statewide average.

In Tables 8 and 9 the City of Pittsburg's pounds per capita is the highest. This is not unusual for a city with a substantial amount of industrial generators. Additionally, the high rate of recycling by Pittsburg industry is not reflected in the calculations for this data. Pittsburg also has high housing growth and significant waste generation from the numerous transportation and energy generation projects underway or recently completed in the City.

Similar to the City of Pittsburg, San Ramon's increase in generation can be attributed to tremendous economic activity, most notably the development of multiple, large scale office parks, in the City's commercial sector during the '90s. However, San Ramon's recycling programs continue to accommodate this unexpected commercial growth – which is not accounted for in the employment figures used in the Adjustment Method – as evidenced by the City's attainment of the diversion goals.

Table 8. Pounds per Capita in Base Year

Jurisdiction	Base Year	Population ¹¹	Total Tons Generated ¹²	Per Capita ¹³
Antioch	1999*	82,268	124,295	8.28
Brentwood	1990	7,563	9,421	6.83
Clayton	1990	7,317	7,684	5.75
Concord	1990	111,348	146,525	7.21
Danville**	1990	31,306	39,309	6.88

¹² Total Tons Generated is taken from jurisdictions' waste characterization studies for the purposes of establishing base year data (either in SRRE or when requesting new base years).

¹³ Per Capita is the Pounds Per Person Per Day which was calculated by multiplying the Generation Estimate (represented in tons) by 2000 then dividing by the Population which results in the Pounds Per Person Per Year which is then divided by 365.

Jurisdiction	Base Year	Population ¹¹	Total Tons Generated ¹²	Per Capita ¹³
Pleasant Hill	1990	31,585	37,200	6.45
San Ramon	1990	35,303	54,438	8.45
Unincorporated [■]	1990	151,395	199,967	7.24
WCCIWMA	1990	169,741	245,850	7.94
Walnut Creek ^{**}	1990	60,569	101,136	9.15
Countywide	see above	833,470	1,187,825	7.81

* These jurisdictions have CIWMB approved base years later than 1990.

** These jurisdictions had their 1990 CIWMB base years adjustments approved in both 1995 and 1996 to include self-haul tonnages not included in their initial waste characterization studies.

Overlooked base-year generation results in lower diversion rate estimates in subsequent years. Some jurisdictions have undergone base year adjustments (e.g. Concord, Danville, Lafayette, Orinda, Moraga and Walnut Creek) and others have had new base years approved (e.g. Antioch, Martinez and Pittsburg) to improve accuracy of diversion rate calculations.

Moraga	7,416	10,481	41%
Orinda	8,428	13,437	59%
Pittsburg	29,856	43,179	45%
Pleasant Hill	17,598	34,798	98%
San Ramon	33,028	42,755	29%
Unincorporated*	183,077	154,517	-16%
WCCIWMA	129,148	194,842	51%
Walnut Creek	53,938	65,640	22%
Countywide	636,390	838,603	32%

Contra Costa County experienced higher than anticipated growth during the economic expansion of the nineties. Projected disposal rates were surpassed in most areas, especially in East County (Antioch, Brentwood, Pittsburg) which has become one of the new bedroom communities of the San Francisco Bay Area. Such high growth trends were not anticipated in our area. In addition, some disposal projection methodologies used at the time were flawed.

* Unincorporated includes City of Oakley

Table 12. Projected Generation vs. Calculated Generation

Jurisdiction	1999 Estimated Generation		Percent Difference
	SRRE Projected	Calculated	
Antioch	79,554	124,295	56%
Brentwood	14,501	31,732	119%
Clayton	9,696	11,050	14%
Concord	138,053	169,793	23%
Danville	43,322	45,839	6%
Lafayette	24,723	36,276	47%
Martinez	35,960	73,873	105%
Moraga	17,088	20,372	19%
Orinda	16,978	13,437	-21%
Pittsburg	54,943	125,670	129%
Pleasant Hill	36,421	43,161	19%
San Ramon	64,050	91,604	43%
Unincorporated*	225,021	232,947	4%
WCCIWMA	245,853	194,842	-21%
Walnut Creek	95,723	117,254	22%
Countywide	1,101,886	1,332,145	21%

The City of Martinez high percent difference is mainly due to the fact that concrete and asphalt were not calculated in their original SRRE but were added in their new approved base year.

The difference in San Ramon's estimated and calculated waste generation is attributable to the unexpected population (e.g. housing) growth during the '90s (28%) which was exceeded by skyrocketing commercial development.

DIVERSION

The diversion performance for the County, Regional Agencies and the Cities/Towns are identified in Table 13.

Table 13. Diversion Rate Trends (1995-1999)

N/D = Not Determined (because jurisdiction subsequently set new base year)

* These 1999 diversion rates have not been approved by the CIWMB; these numbers represent what the Jurisdiction reported.

** Approved New Base Year

*** Average diversion achieved by jurisdictions in Contra Costa County.

Table 13 demonstrates the effectiveness of programs implemented by the high diversion reached by most jurisdictions. The Unincorporated County's diversion rate was high in 1995 & 1996 due to inaccuracies in the disposal data for self-haul. The problem with the data was many loads from unincorporated areas were characterized as originating in city areas. Contra Costa County worked with the facility operator's cities and an address-checking program is in place to minimize this problem. Some SRRE programs that are in place but have not yet reached maturity, are expected to provide additional diversion in ensuing years.

FUNDING SOURCES

Solid waste collection franchise fees, storm water fees, clean water funding, general fund and/or grants are used to fund each jurisdiction's implementation of the programs identified in its SRRE and HHWE. The County collects \$0.15 per ton for solid waste disposed in Contra Costa facilities to fund countywide programs, including but not limited to, staffing the County Recycling Hotline and development and printing of the County Recycling Guide.

PROGRAM IMPLEMENTATION

The annual reports have provided updated information concerning program implementation. Nearly all selected programs have been implemented. Programs not selected have also been implemented and reported in annual reports. Although composting facilities were planned to be located in Central and East County they have not yet been realized. However, home composting programs and curbside yard waste collection programs have been implemented in most jurisdictions to handle the compostable organic waste stream. Refer to Appendix A to view 1999 PARIS Reports which summarize the status of each jurisdiction's implementation of programs.

PERMITTED DISPOSAL CAPACITY

See Table 14 on Page 21. See "Other Issues" section below for brief description of operating landfills and transfer stations.

AVAILABLE MARKETS

Markets for recovered materials have been available. Though the market material quantity supply and demand and resulting market prices often fluctuate, outlets continue to be available.

Most available construction and demolition material recyclers in and near the County have been identified and listed in the Contra Costa County Builder's Guide to Reuse and Recycling, created in 1999 with plans for update in 2002.

MBA Polymers, Amigo Bag, Gaylord Container Corporation, and Epic Plastics, privately owned manufacturers located within the County, provide markets for various recycled plastics (including unique materials such as PC, PC/ABS, ABS, HIPS) and OCC.

The County Recycling Market Development Zone (RMDZ) began new market development activities in 1998. Most jurisdictions rely on their franchised haulers to find material markets (i.e. Recycle America, Republic, Allied Waste Industries, Concord and Pittsburg Disposal, etc.)

IMPLEMENTATION SCHEDULE

Minor changes in implementation schedules have occurred but are not significant. Implementation status and changes are reported individually by local agencies in their jurisdiction's Annual Reports to the CIWMB. A copy of each jurisdiction's PARIS Report from their 1999 Annual Report is included herein as Appendix A.

OTHER ISSUES

As discussed above in the Setting section, three geographical areas characterize the County: West, Central and East County. Each of these regions could be considered a waste shed as each utilizes certain facilities and/or franchised haulers for solid waste disposal. Figure 2 shows the location of the four operating transfer stations and three operating landfills in the County.

Most material generated in West County is disposed of at the landfill in West County, when this facility closes, solid waste will be disposed in a Solano County landfill. Most material generated in North Central County is disposed of in facilities in North Central County and in Solano County. Most material generated in South Central County is disposed of in facilities in North Central County and in Alameda County. Most material generated in East County is disposed of in North Central County and in Solano County. The West County Integrated Resource Recovery Facility (IRRF) is recognized as the transfer station serving West County. The Contra Costa Transfer and Recovery Station (CCTRS) is recognized as the transfer station serving Central and South County. The Pittsburg Transfer and Recovery Station is recognized as the transfer station serving East County. The Brentwood Transfer Station serves only the City of Brentwood.

The WCCIWMA is in discussions with the County, the City of Richmond, its Member Agencies and the local landfill and transfer station operator in regard to how to best

Contra Costa County

Five Year CIWMP Review Report

handle the Region's solid waste transfer needs in anticipation of the upcoming closure of the West County landfill.

There are three permanent household hazardous waste collection facilities operating in the County, one in West, one in Central and one in East County. These facilities accept a full-range of hazardous wastes (with several exceptions) from households and from businesses that are considered conditionally exempt small quantity generators. The wastes accepted at these facilities are managed consistent with the waste management hierarchy and there is no on-site treatment or disposal.

Contra Costa County

Five Year CIWMP Review Report

Figure 2. Map of Landfills & Transfer Stations in Contra Costa County

CHAPTER 4.0 SUMMARY STATEMENT

- The overall framework of the CIWMP is still applicable.
- The goals, objectives, policies, funding sources, and responsible administrative organizational units noted throughout the CIWMP are substantially accurate.
- Nearly all of the selected or alternative programs have been and are continuing to be implemented, as well as programs not selected in the SRREs.
- Although a few programs have been revised, overall program implementation has been discussed in the annual reports and the jurisdictional PARIS reports have been kept updated.
- Consequently, the County feels that the most effective allocation of available resources at this time is to continue to utilize the existing CIWMP as a planning tool augmented by the annual reports.
- For these reasons, the County does not feel that revision of its CIWMP is warranted or desirable at this time.

Table 14. Estimated Remaining Capacity Landfill Site Life

Contra Costa County Landfills						
Landfill	Remaining Capacity/ ^{1/}		Maximum Permitted	Site Life in Years		Days Operation Per Year
	Cubic Yds	Tons		Avg.	at Max.	
Keller Canyon LF	54,799,135	27,662,603	1,703	2,750	52.1	312
Acme LF	92,950	41,828	118	1,500	1.1	312
WCCSL	917,091	504,400	958	2,500	1.5	360

/1/ Remaining Capacity as of January 1, 2001 for WCCSL (based on 1,100 pounds/cubic yard), and June 15, 2001 for Acme LF. For Keller Canyon LF, the remaining capacity was determined based upon February 18, 2000 survey data adjusted to account for projected disposal through January 1, 2001.

/2/ For each landfill, this figure represents the average of the two calculated daily averages for waste received at the landfill in 1999 and 2000.

/3/ Projected daily average of 1,734 TPD, 312 day per year basis, for the period 2000-2007, for the entire County, based on projections in the Countywide Siting Element.

(Waste-to-Energy): [none]

Disposal Destination

This disposal destination data shows the total amount and percentages of waste from the selected county disposed within its boundaries, in other counties, and/or exported out of state.

Disposal OutFlow Destination(s) The disposal outflow destination maps show the total amount and percentages of waste from the selected county that this jurisdiction is a portion of disposed outside its boundaries, in other counties, and/or exported out of state.

Disposal InFlow Destination(s) The disposal inflow destination maps show the total amount and percentages of waste the selected county that this jurisdiction is a portion of received within its boundaries from other counties, and/or imported from out of the state.

Disposal data for the maps was compiled from the board's disposal reporting system (DRS). The DRS tracks the amount of solid waste disposed by each jurisdiction in California. Counties in California must submit quarterly disposal reports to the Board showing the amount of waste disposed by each jurisdiction in a county. Waste disposed by a county for 1999 was calculated by totaling a county's four quarters of disposal data for all the jurisdictions in the county. Waste received by a county was determined by totaling four quarters of disposal data by place of origin received by a county's landfills.
